Forecast for Sunday 28 Apr 2024

Weather: A cloudy start to the day for most with any brighter spells found in the northwest of the park. Through the morning sunny spells develop for most regions. Staying largely dry through the day, perhaps some slight rain in the east at first. Heavy showers by the end of the evening.

Chance of cloud-free hill tops above 800m: 40% in the southeast during the morning, becoming 80% for all areas of the Park by the afternoon.

Low Cloud and visibility: Occasionally cloud obscuring hills above 600-700m mainly in the south and east of the Park during the morning with most cloud bases above summits in the northwest and for all through the afternoon. Very good visibility expected.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Suitable winter layers should be worn due to the significant windchill, even at lower levels.

Forecast for Monday 29 Apr 2024

Weather: Heavy showers through the early hours of Monday morning with a risk of thunder and or hail, shortly followed by a more cohesive band of rain in the afternoon. Near gale force southerly winds.

Maximum wind: Southerly 30-35 mph gusting 40-50mph.

Chance of cloud-free hill tops above 800m: 30%

Low Cloud and visibility: In the morning heavy showers will reduce visibilities to poor or very poor with scattered to broken cloud bases covering hills above 300m. By midday, perhaps some brighter spells before further cloud fills in from the west here cloud bases 500-600m.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 10 Celsius.
At 800m: Plus 2 Celsius becoming Plus 3 Celsius.
Freezing level: Above summits.
